The content analysis of textbooks in pre-occupational course (secondary school) for students with intellectual disabilities emphasizes on attention to the skills of Gardner's Multiple Intelligences.
Attachment Patterns as Predictors of Conduct Disorder in 9-11-Year-Old Students in Bandar Abbas City, Iran

Mahmoodi, M. Zarei, E. and Askarii, M.

ABSTRACT:
This research was aimed at studying the relationship between attachment patterns and conduct disorder. The research was conducted with 136 students aged between 9-11 years old in Bandar Abbas City. The PAT (Penn Attachment Test) was used to measure the attachment patterns. The CDPS (Conduct Disorder Parental Stress Inventory) was used to measure the conduct disorder. The data were analyzed using the Pearson correlation test. The results of the study showed that the avoidant attachment patterns had the highest and the secure and then the avoiding patterns had the list prediction power in conduct disorder.

Key words: Conduct Disorder, Attachment Patterns, Students

The Effectiveness of Life Skills Training on Achievement Motivation and Life Satisfaction of Students

Lak, Z. Rajabi, S. Moazedian, A. Pournikdast, S. and Sabetimani, M.

ABSTRACT:
Since a considerable part of students' lives are spent at school, a huge contribution is made by the schools to education. In this research, the life skills training was conducted on 110 students in Bandar Abbas City, Iran. The results were compared with 110 students who did not receive life skills training. The data were analyzed using the t-test. The results showed that the students who received life skills training had a higher level of achievement motivation and life satisfaction compared to the students who did not receive life skills training. The conclusion of the research has important implications for students regarding education and counseling services.
