Study of Rumination and Locus of Control Roles in Depression of Female Employees of the University of Medical Sciences, Rasht, Iran

Original Research, C51

Mohammadi K., Zarei E., Chaleshgar M.

ABSTRACT: Depression is a phenomenon that is considered to be one of the most complicated issues of mental health in today's world. It is a disease that affects individuals' mental health and leads to a reduction in the quality of life, work, and social relations. Depression affects both sexes, but women are more susceptible to it. Ruminative thinking is considered to be an important factor in depression. Locus of control is another important factor in depression. This study aims to investigate the role of rumination and locus of control in depression of female employees of the University of Medical Sciences, Rasht, Iran.

Key words: Rumination, Locus of control, Depression, Female employees.

Attachment Patterns as Predictors of Conduct Disorder in 9-11-Year-Old Students in Bandar Abbas City, Iran

Original Research, C76
Mahmoodi, M. Zarei, E. and Askarii, M.

ABSTRACT:
This research was aimed at studying the relationship between attachment patterns and conduct disorder. The research methodology was descriptive-correlational. A total of 386 students were selected from different educational levels in the Bandar Abbas City as the research population. The sample size was determined to be 240 students. The data were collected using a three-stage test, including the Ainsworth’s Attachment Security Scale and the Teacher Questionnaire of Social Behavior Disorder. The findings of the research showed that attachment patterns have a significant relationship with conduct disorder. The avoidant attachment pattern had the highest and the secure and then the avoiding patterns had the list prediction power in conduct disorder.

Key words: Conduct Disorder, Attachment Patterns, Students

The Effectiveness of Life Skills Training on Achievement Motivation and Life Satisfaction of Students

Original Research, C77
Lak, Z. Rajabi, S. Moazedian, A. Pournikdast, S. and Sabetimani, M.

ABSTRACT:
Since a considerable part of students' lives are spent at school, a huge contribution is made by the schools to education and counseling. The teachers' role is a determining factor in the students' success. Therefore, the present research is conducted to investigate the impact of life skills training on the students' achievement motivation and life satisfaction. The research methodology was experimental posttest-only design. A total of 120 students were selected from different educational levels in the Bandar Abbas City as the research population. The sample size was determined to be 60 students. The data were collected using a two-stage test, including the Life Skills Test and the Teacher Questionnaire of Social Behavior Disorder. The findings of the research showed that the life skills training has a significant relationship with the students' achievement motivation and life satisfaction. The conclusion of the research has important implications for students regarding education and counseling services.
